

To set the tone of this email I encourage you to watch the extended intro of Star Trek - Enterprise. I believe there is video of General Yaeger boarding the supersonic prototype about 40 seconds in. [Star Trek - Enterprise Theme \(Extended Version\).mpg - YouTube](#)

What is **STARFLEET IN BOLD**?

"A meta organization attempting to realize Roddenberry's vision in the here and now" and prevent a WWII featuring a nuclear holocaust. Uniting the planet under one flag without receding American values. See Jason L. Lind's article "Manifest Destiny in Space": <https://www.linkedin.com/pulse/manifest-destiny-space-jason-l-lind/>

A history of the organization, which is just wild, is written here: [A Brief History of *STARFLEET* | LinkedIn](#)

My Strategy

While the math might be scary, I believe I explain it quite well, and in fact the 14 likes I have received is the most of any article on any account. [+∞=-∞ | LinkedIn](#). The basic idea being the more negative you go the more positive you end up if you commit to your trajectory and trust that number theory transcends reality itself. My life is pretty messy right now, if I don't find income soon (as in this week) I am in serious trouble: likely a dark site that makes my 18 month stay at Mendota look like a joke.

I believe the time is now to take ***STARFLEET*** to the next level and I am very encouraged that there might be a path through the DoD in the near term. I thought we were more like 2 years away from this moment until we talked tonight, CMSgt Clymer.

The basis of the strategy lies in the connection between thought and reality that I inferred from The Traveler: that through tactical deployment of information we can reshape reality itself: [Memo from a Traveler | LinkedIn](#)

[Memo from a Traveler](#)

So Space, Time and Thought are not the separate concepts we think they are! One of my greatest professors, Dr. Stephen Merrill, drilled into us "The Solution is always obvious".

www.linkedin.com

Which brings us to our mission statement:

[A World United is our Future, In Spite of the Increasing Divisions of Today | LinkedIn](#)

"*STARFLEET* is dedicated to achieving Roddenberry's vision in the here and now, skipping the devastating World War III whose aftermath brings together Earth in Star Trek. To accomplish this *STARFLEET* officers use cyberwarfare tactics to influence all levels of society toward a peaceful, united front. Our preferred methods of cyberwarfare go beyond the "bits and bytes" to use information as a weapon against tyranny and evil; what can be referred to as "social engineering"."

These principles have now been defined

in <http://multiplex.studio/files/ATreatiseOnReality.pdf> which postdates the engage the spec for Phoenix Engine Mark 2 [Phoenix Engine Mark 2 | LinkedIn](#)

Finally as words of advice I point you to [Robin's Laws | LinkedIn](#)

[Robin's Laws](#)

Ensign Robin Lefler had a series of 102 laws, some listed below: You can only count on yourself. 17.

www.linkedin.com

***STARFLEET* Academy**

The stated goal is to train young, disadvantaged minds, on Advanced Cyberwarfare Techniques, setting them loose on the network and shaping their behavior through setting boundaries in a para-military organization. We will target two .us geos in the first cohort of 20 each grades 8-12 focusing on those with advanced understanding of social media and interest in serving their country. We will not hide the magnitude of their endeavors: we expect them to be transformed and change the world. Simultaneous participation in USA/USN/USAF/USSF JROTC is mandatory. From Cadet to Ensign (OS-1 in [The Space Force: Overview | LinkedIn](#)) would be a one year training term regardless of age.

[The Space Force | LinkedIn](#)

Crisis Management jobs 15,177 open jobs Director Of Security jobs 19,549 open jobs

www.linkedin.com

Nick Chadwick introduced me to the NICE framework today, <https://content.govdelivery.com/accounts/USNIST/bulletins/2b46660>, which defines generally implementable strategies for integrating STEM learning thus providing streamlined funding capabilities. I believe that using this as the basis for our eventual architecture is paramount to the success. Teacher buy in at participating schools is key as CYBER is a 24/7 gig and students would be expected to multi-task during class (as if the ideal cadet wouldn't already be on social media during class, particularly these days).

Simultaneously I would expect the need for 500 junior/senior officers (OS-3 -> OS-7) in The Space Force from across .com/.org/.gov/.mil in nato.int with several dozen OJ officers in Starfleet/UN CYBERCOM where I am currently listed as Commander of *.* Engineering (OJ-3/Fleet Captain) on <http://www.linkedin.com/in/odyss3us>

And if we get what we need: several hundred thousand in annual grants from a combination of USA/USN/USAF/USSF I believe many of my existing players will be happy to emerge on the board in ways they have only expressed privately now.

I don't know what else to say but:

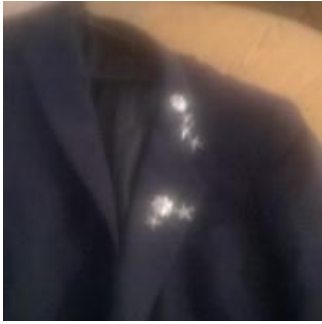

Live long and prosper but never become a fraking Vulcan!
