NOT QUALIFIED FOR SECURITY CLEARANCE

With nearly three decades in CYBER and two in professional IT I am uniquely qualified to tackle any task at any scale. My “Metamorph Architecture Methodology” describes affecting a continuum through the transformation of Business-Technology-Brand—ensuring these concepts drive each other in concert.

While this methodology was only formally defined in 2018 I have employed it throughout my career from the non-profit organization level to the F50 to the DoD as an independent paid and unpaid consultant.

Whilst in my past I was hands on in software engineering today I focus on strategy at an all-domain level in .org, .gov, .com and .mil.

Jan 2021—Present
Liberty and Prosperity 4all

In 2016 I added to my LinkedIn, on official NATO letterhead, the role of “Commanding General—NATO CYBERCOM” with the description of “Reporting to Lt. General William T. Lord at UN” and thus a concept of driving Peace & Tranquility in cyberspace was born. Today UN CYBERCOM’s design is document on the 14th page of the 2020 “A Cognitive Cyberwar” (see page 3) and is an active international development vector. As Chief Architect I am responsible for designing and manifestation of the concept into reality.

Our current primary focus is advancing the concept of “Cognitive Warfare” as well with other aspects of Cybersecurity such as Zero Trust Architecture (ZTA), Biometric Human Protect Surface and then Multi-Domain Operations (MDO) where we achieved showcase status at AFWERX Fusion 2019 and nearly accomplished the same at AFWERX Energy Challenge 2020. We even dabble in aerospace design including the proponent of an F-45 design targeted for the USSF.

NexDevices was founded in Jack Driscoll’s basement in 2011 with the design and prototype production of our NexRouter: a managed, high security cloud networking appliance for the sophisticated and proficient alike. We also designed NexCenter: a professional grade entertainment system and later NexCraft which is the new F-45 project we have proposed: an advanced aerospace craft.

My research has demonstrated 90% of Americans support 75% of my policies, which of course is way more than the mainstream political candidates. I believe in very limited government and a small powerful modern defensive transformation force, effectively .gov at 5% of current budget and .mil at 35%. Privatization of most of the civil three-letter agencies (FTC, FCC, FAA, etc.) and coordination with .com & .org to provide the social relief Social Security and Medicare provide.

Current Roles

Securing the Human Protect Surface, January 2021

<http://multiplex.studio/files/SecuringTheHumanProtectSurface.pdf>

Biomantic design for uniquely identifying humans from their bio-signals employing various COTS and custom wearables to achieve a base beyond the base.

The Development Exchange, October 2020

<http://development.exchange>

Project definition and plan for a platform that federates communication and production tools for superior manifestation via coordination of .org, .com, .gov and .mil.

A Cognitive Cyberwar, September 2020

with Mitchell Maddox & Nick Chadwick

<http://multiplex.studio/files/CognitiveCyberwar.pdf>

Far reaching strategy and design paper on the application of Cognitive Warfare, prepared for USD-R&E's S&T Cyber Roadmap.

Ideal Organizational Theory 2.0, September 2020

<http://multiplex.studio/files/IdealOrganizationalTheory2.pdf>

Theoretical Artificial Intelligence paper that brings formal mathematics to the original 2011 paper. In it I contend the singularity is not computational but cognitive.

A Treatise on Reality, June 2020

<http://multiplex.studio/files/ATreatiseOnReality.pdf>

Introduction to new branch of mathematics which is then used to robustly define a Cyber-Space-Time-Thought continuum and apply it to military force structuring.

Zero Trust Architecture and Innovations, May 2020

<http://multiplex.studio/files/ZTA.pdf>

A brief for USAF Cyberspace Dominance on the state of ZTA and enhancements.

permtuo.xyz Project, 2018

<http://wwidew.net/sigma>

Novel financial instrument promoting a Synergistic Equitizing Transformation Package.

Alpha Papers, 2011-2015

<http://wwidew.net/alpha>

About a dozen research papers and proposals ranging from "On Exchange Medium and Speculation" to "Milwaukee Private Library".

Omega Papers, 2007-2010

<http://wwidew.net/omega>

Founding papers of my organization, Lind Innovation, including Mission Statement, Strategy and the original "Ideal Organizational Theory" paper.

"It is better to have been, then not to have been, then to have been nothing at all." What truly is logic? Who decides reason? "It is only in the mysterious equations of love that any logic or reason can be found."

-John Forbes Nash, Jr.
